Sapun Jyoti Gogoi

LinkedIn: https://www.linkedin.com/in/sapun
Github: https://github.com/sapunjgogoi
Email: sapunjgogoi@gmail.com
Mobile: +919864880206

SKILLS

Languages: C, C++, Java, Python
Full-Stack: Express.js, React.js, Node.js, HTML, CSS, JavaScript
Cloud & DevOps: AWS, Docker, Kubernetes, Terraform
Tools & CI/CD: Git, GitHub, Jenkins, GitHub Actions, VS Code, Postman
Databases & OS: MongoDB, MySQL, Linux (Ubuntu), Windows
Soft Skills: Team collaboration, Adaptability, Problem-solving

PROJECTS

Krishi AI – Smart Farming Assistant | *Flask, Gemini API, HTML, CSS, JavaScript* *link* Feb 2026 – Present

- Built an AI-driven agriculture assistant that analyzes crop symptoms using natural language processing and provides accurate disease diagnosis and treatment suggestions.
- Designed and implemented a secure backend using Flask, integrating Gemini API while protecting sensitive credentials through environment-based configuration.
- Enhanced user experience with a modern, responsive interface, structured result presentation, and robust input validation and error handling.

Restart — Focus Recovery Web App | *HTML, CSS, JavaScript, AWS, Gemini AI* *link* Dec 2025 – Jan 2026

- Developed a cloud-based productivity web application designed to help users regain focus through guided mental reset techniques such as breathing exercises, brain puzzles, and quick activities.
- Integrated serverless architecture using AWS Lambda and API Gateway to generate personalized AI-driven focus plans powered by Gemini API, ensuring secure and scalable backend processing.
- Developed a responsive UI with real-time animations using JavaScript and deployed the application on Amazon S3 with CloudFront CDN for high availability and low-latency delivery.

TRAINING

Cipher Schools Jun 2025 – Jul 2025

Data Structures and Algorithms using Java Programming *link*

- Strengthened core problem-solving skills by designing efficient algorithms and implementing optimized data structures in Java.
- Gained hands-on experience with arrays, linked lists, stacks, queues, hash maps, trees, and graphs, along with key algorithms such as sorting, searching, recursion, greedy methods, and dynamic programming.
- Applied concepts by coding each data structure and algorithm in Java, optimizing solutions through Big-O analysis, and developing modular, performance-focused programs using object-oriented principles.

CERTIFICATES

AWS Cloud Practitioner Essentials | *Coursera* Mar 2026
Master Generative AI & Generative AI Tools | *Infosys* Aug 2025
Social Networks | *NPTEL* Apr 2025

ACHIEVEMENTS

LeetCode (*Link*): Solved 250+ problems; earned 11 badges and completed 150+ active coding days
HackerRank (*Link*): Earned 5 star badge in Python and Java programming language

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Aug 2023 – Present
Computer Science and Engineering;
CGPA: 7.7

Genius Academy Lakhimpur, Assam
Intermediate Mar 2021 – May 2022
PCMB;
Percentage: 72%

Sankardev Sishu Niketan Lakhimpur, Assam
Matriculation Mar 2019 – May 2020
Percentage: 86.2%
